## **SYNAGISTICS LAUNCHES DIGITAL FINANCE GROUP TO PIONEER ASIA'S INTEROPERABLE MULTI-CURRENCY STABLECOINS AND REAL-WORLD ASSET TOKENIZATION SOLUTIONS ECOSYSTEM**

This announcement is made by Synagistics Limited (the “**Company**” or “**Synagistics**”, together with its subsidiaries, the “**Group**”) on a voluntary basis to keep holders of the Company’s securities and potential investors of the Company updated on the Group’s latest business developments.

The board of directors of the Company (the “**Board**”) is pleased to announce that it is establishing a landmark venture to launch Synagistics Digital Finance Group (“**SDFG**”), that is set to become a trailblazer in pioneering solutions for interoperable, multi-currency stablecoins and real world asset tokenization promoting development and adoption across Asia subject to regulatory and licensing approvals.

Through SDFG, Synagistics intends to bridge traditional financial systems with blockchain-based rails by offering compliant and tokenized representations of Real-World Assets trade receivables, inventory, and even future cash flows. These tokenized assets, when paired with interoperable multi-currency stablecoins pegged to currencies such as the Hong Kong Dollar (HKD), offshore Renminbi (CNY-H), Singapore Dollar (SGD), and other applicable fiat currencies, will enable efficient, programmable settlement, enhanced liquidity, and seamless interoperability across fragmented financial systems.

### **Strategic Digital Financial Infrastructure for Asia**

SDFG is currently in discussions with regional and international stakeholders — including digital payment providers, licensed financial institutions and traditional banks — to build and deploy a next-generation digital payment infrastructure that will serve as a core digital settlement tool in the cross-border financial ecosystem that minimizes friction, reduces FX costs, and replaces legacy wire systems with real-time, low-cost payment capabilities.

SDFG will be led by Ms. Katherine Tsang, Founder of the Max Giant Capital Group, former Chairperson of Greater China at Standard Chartered, as well as a highly respected financial leader currently serving as Independent Non-Executive Director (“**INED**”) for corporations such as China CITIC Bank International and Fidelity Emerging Markets Limited (LSE), together with a team of seasoned financial and payments industry veterans. With decades of experience in asset management, banking, risk governance, and regional financial integration, Ms. Tsang brings exceptional credibility and execution capability to spearhead this initiative.

“As Asia accelerates toward digital integration, the financial rails that power trade must evolve. Stablecoins and real-world asset tokenization will redefine how capital flows across borders,” said **Olive Tai**, CEO of Synagistics Limited. “Through SDFG, we’re building critical infrastructure to unlock efficiencies and financial inclusion across Asia’s fast-growing trade corridors.”

“I’m excited to join forces with Synagistics, a company at the forefront of digital transformation. Its digital commerce platform and ecosystem offer an ideal foundation to deliver compliant, interoperable digital payment and institutional-grade tokenization,” added **Katherine Tsang**. “Our goal is to create a trusted, scalable solution that supports sovereign currencies, enhances regional liquidity, and empowers businesses with 24/7 programmable money.”

## **Real-World Adoption and Use Cases**

SDFG is also uniquely positioned to leverage Synagistics’ existing partnerships and commerce infrastructure to drive rapid adoption:

- **With China Post Hong Kong**, Synagistics is co-developing an AI-powered digital commerce and trade platform that supports the internationalization of China brands and enables two-way e-commerce between China, Hong Kong, and Southeast Asia.
- **With Jiangsu Soho**, a key Belt and Road Initiative (BRI) SOE, Synagistics is rolling out a pan-regional AI-driven digital trade corridor across 11 countries, integrating digital logistics, commerce, and now programmable finance.

These foundational initiatives create a robust, ready-made user base for stablecoins and tokenized assets — particularly across the SME and export sectors — where traditional finance infrastructure might be slow, costly, and opaque. The embedded use cases reduce time-to-scale significantly for SDFG’s solutions, align with government efforts in the region to boost BRI trade integration and enhance digital trade infrastructure.

## Significant Market Opportunity and Tailwinds

Asia-Pacific is rapidly emerging as the global focal point for digital trade and programmable money. Southeast Asia's e-commerce GMV is expected to surpass USD295 billion by 2025, while intra-Asia trade — particularly among China, Central Asia, and ASEAN — is projected to exceed USD700 billion. As regional economies seek alternatives to legacy financial networks, the market demand for regulatory-compliant, interoperable stablecoins and tokenized assets is expected to surge.

## About Synagistics Limited

Synagistics Limited is a Singapore-based AI and big data company listed on the Main Board of the Hong Kong Stock Exchange. The company made history by completing Hong Kong's first-ever De-SPAC transaction and is backed by strategic shareholders including Alibaba, Gobi Partners, and Hong Kong Telecom. Synagistics is at the forefront of innovation, driving the digital transformation of Asia's rapidly evolving economy.

As a leading provider of digital solutions in Southeast Asia, Synagistics empowers more than 600 enterprises and global brands through its flagship data-driven commerce platform, Synagie. With the launch of Geene, its enterprise-grade generative AI platform, Synagistics has significantly expanded its AI capabilities -accelerating intelligent technology adoption across industries. Building on its strong technological foundation and commercial infrastructure, the company is also advancing into digital finance and asset tokenization delivering scalable, compliant solutions that connect commerce, data, and programmable financial services. Synagistics continues to strengthen its footprint across Greater China and key international markets, enabling businesses to thrive in an AI-powered digital future.
